Mingda:

Per your request for data for the Incentive Compensation (IC) justification, I am attaching a list of clinical studies that have completed (or will complete) in 2003, and those that were initiated clinically in 2003 that will continue into 2004. It includes both development and research studies.

As you had requested, a study whose clinical conduct will be completed in 2003 was considered "complete" for this purpose (not contingent upon receipt of data or draft report). Further, for studies that continue into 2004, I only listed those studies whose clinical conduct actually started in 2003 (none that were still in the design or planning stages).

If you require further details or have questions, please let me know.

Thanks,
Valerie
